

GARVIT SINGH

Full Stack & Backend Developer · Software Product Engineering Student

garvitsingh171@gmail.com · +91 9690067289 · Jaipur, Rajasthan · github.com/garvitsingh171 · linkedin.com/in/garvitsingh171

PROFESSIONAL SUMMARY

CSE (Software Product Engineering) student at JECRC University × Kalvium with production-grade MERN, REST API, Docker, and open-source experience. Shipped Workoutly (full-stack with JWT auth, Socket.io, and Docker deployment) and BeatHub API (6-domain modular REST API with RBAC and Swagger docs). Currently architecting Pravaah on the PERN stack. Maintains 600+ GitHub contributions and 4–5 merged PRs at Mathesar Foundation. Seeking internship roles in backend, full-stack, or product engineering.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML/CSS | **Learning:** TypeScript, SQL | **Beginner:** Java

Frontend: React.js, Vite, Context API, React Router, Axios, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, bcrypt, RBAC, Middleware, MVC Architecture, WebSockets

Databases: MongoDB, Mongoose, NoSQL Design | **Learning:** PostgreSQL, Prisma, Supabase

DevOps & Tools: Git, GitHub, Docker, Docker Compose, Nginx, Postman, Linux/Ubuntu, Render, Vercel, Neon

Testing & Docs: Jest, Supertest, Swagger/OpenAPI | **Other:** AI API Integration, Prompt Engineering

OPEN SOURCE EXPERIENCE

Mathesar Foundation — Open Source Contributor

Jan 2025 – Mar 2025

- Resolved bugs across a production Python/TypeScript codebase, getting **4–5 PRs merged** by core maintainers after 3 months of iterative issue triage, implementation, and review cycles.
- Navigated full OSS contribution workflow (**issue triage → branch → PR → review → merge**) to ship clean, production-quality code — earning 2 official contribution certificates for sustained impact.

PROJECTS

Workoutly — Full-Stack MERN Workout Tracker

github.com/garvitsingh171/workoutly

React 19, Vite, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Socket.io, Multer, Cloudinary, Docker Compose, Nginx

- Engineered end-to-end auth** (JWT + bcrypt) with ownership-based CRUD and middleware-level route protection across React and Express, **eliminating unauthenticated access** to all user-owned resources.
- Built a validated image upload pipeline** (Multer + Cloudinary) enforcing file-type and size constraints at the middleware layer; integrated **Socket.io** for **sub-second real-time** workout event notifications.
- Containerized 3 services** (React, Express, MongoDB) via Docker Compose + Nginx reverse proxy, collapsing multi-step manual environment setup into a **single `docker compose up` command**.

BeatHub API — Backend Music Catalog REST API

github.com/garvitsingh171/beathub-api

Node.js, Express.js, MongoDB, Mongoose, JWT, bcryptjs, express-validator, Swagger/OpenAPI, Jest, Supertest, Docker

- Architected a modular REST API** across **6 resource domains** (users, songs, artists, albums, playlists, analytics) with JWT + bcrypt auth, role-based admin access (admin/user), and centralized async error handling across all route handlers.
- Enforced express-validator input validation, rate limiting, and cursor-based pagination on the songs endpoint; **auto-generated Swagger/OpenAPI docs** at `/api-docs` and a 500-record seed script — **eliminating manual test-data setup entirely**.

Pravaah — AI-Assisted Clinic Flow Management System

[In Progress]

React, TypeScript, Node.js, Express.js, PostgreSQL, Prisma, Supabase, Docker, GitHub Projects

- Architecting a PERN-stack clinic management product** to solve patient registration, queue tracking, and appointment scheduling inefficiencies; completed MVP scope docs, DB schema, and feature-based TypeScript backend (controller-service-repository pattern).
- Managing full dev lifecycle via GitHub Projects** (structured issues, milestones, labels, PR workflows); roadmap includes **AI-assisted no-show prediction** and patient flow analytics via LLM API integration.

EDUCATION

JECRC University, Jaipur · B.Tech CSE — Software Product Engineering × Kalvium · CGPA: **9.25** (Sem 1) · 2025–2029

Amol Chand Public Sr. Sec. School, Hathras (CBSE) · Class 12: **78.6%** · Class 10 (2023): **90.8%**

ACHIEVEMENTS & PROBLEM SOLVING

- 600+ GitHub contributions across personal projects and open-source; proficient with branches, PRs, issues, milestones, and project boards.
- Won & Led the Squad Portfolio Making Competition at Kalvium — recognized for product thinking and cross-functional team leadership.
- ~100 LeetCode problems solved (Python) — arrays, strings, linked lists; currently learning Java · SIH 2025 Participant · 2× Mathesar OSS Contribution Certificates
